

Event density in $(|\Delta\eta|, |\Delta\phi|)$ -- Scenario A

$s/\sqrt{b}$ for a rectangular ($|\Delta\eta|, |\Delta\phi|$) cut -- Scenario A | best combined: $|\Delta\eta| < 5.0, |\Delta\phi| < 3.1$

Event density in $(|\Delta\eta|, |\Delta\phi|)$ -- Scenario B1

$s/\sqrt{b}$ for a rectangular ($|\Delta\eta|, |\Delta\phi|$) cut -- Scenario B1 | best combined: $|\Delta\eta| < 4.8, |\Delta\phi| < 3.1$
