

MC pileup profile -- does one profile serve signal and QCD?

CMS Simulation Preliminary

(13.6 TeV, 2024)

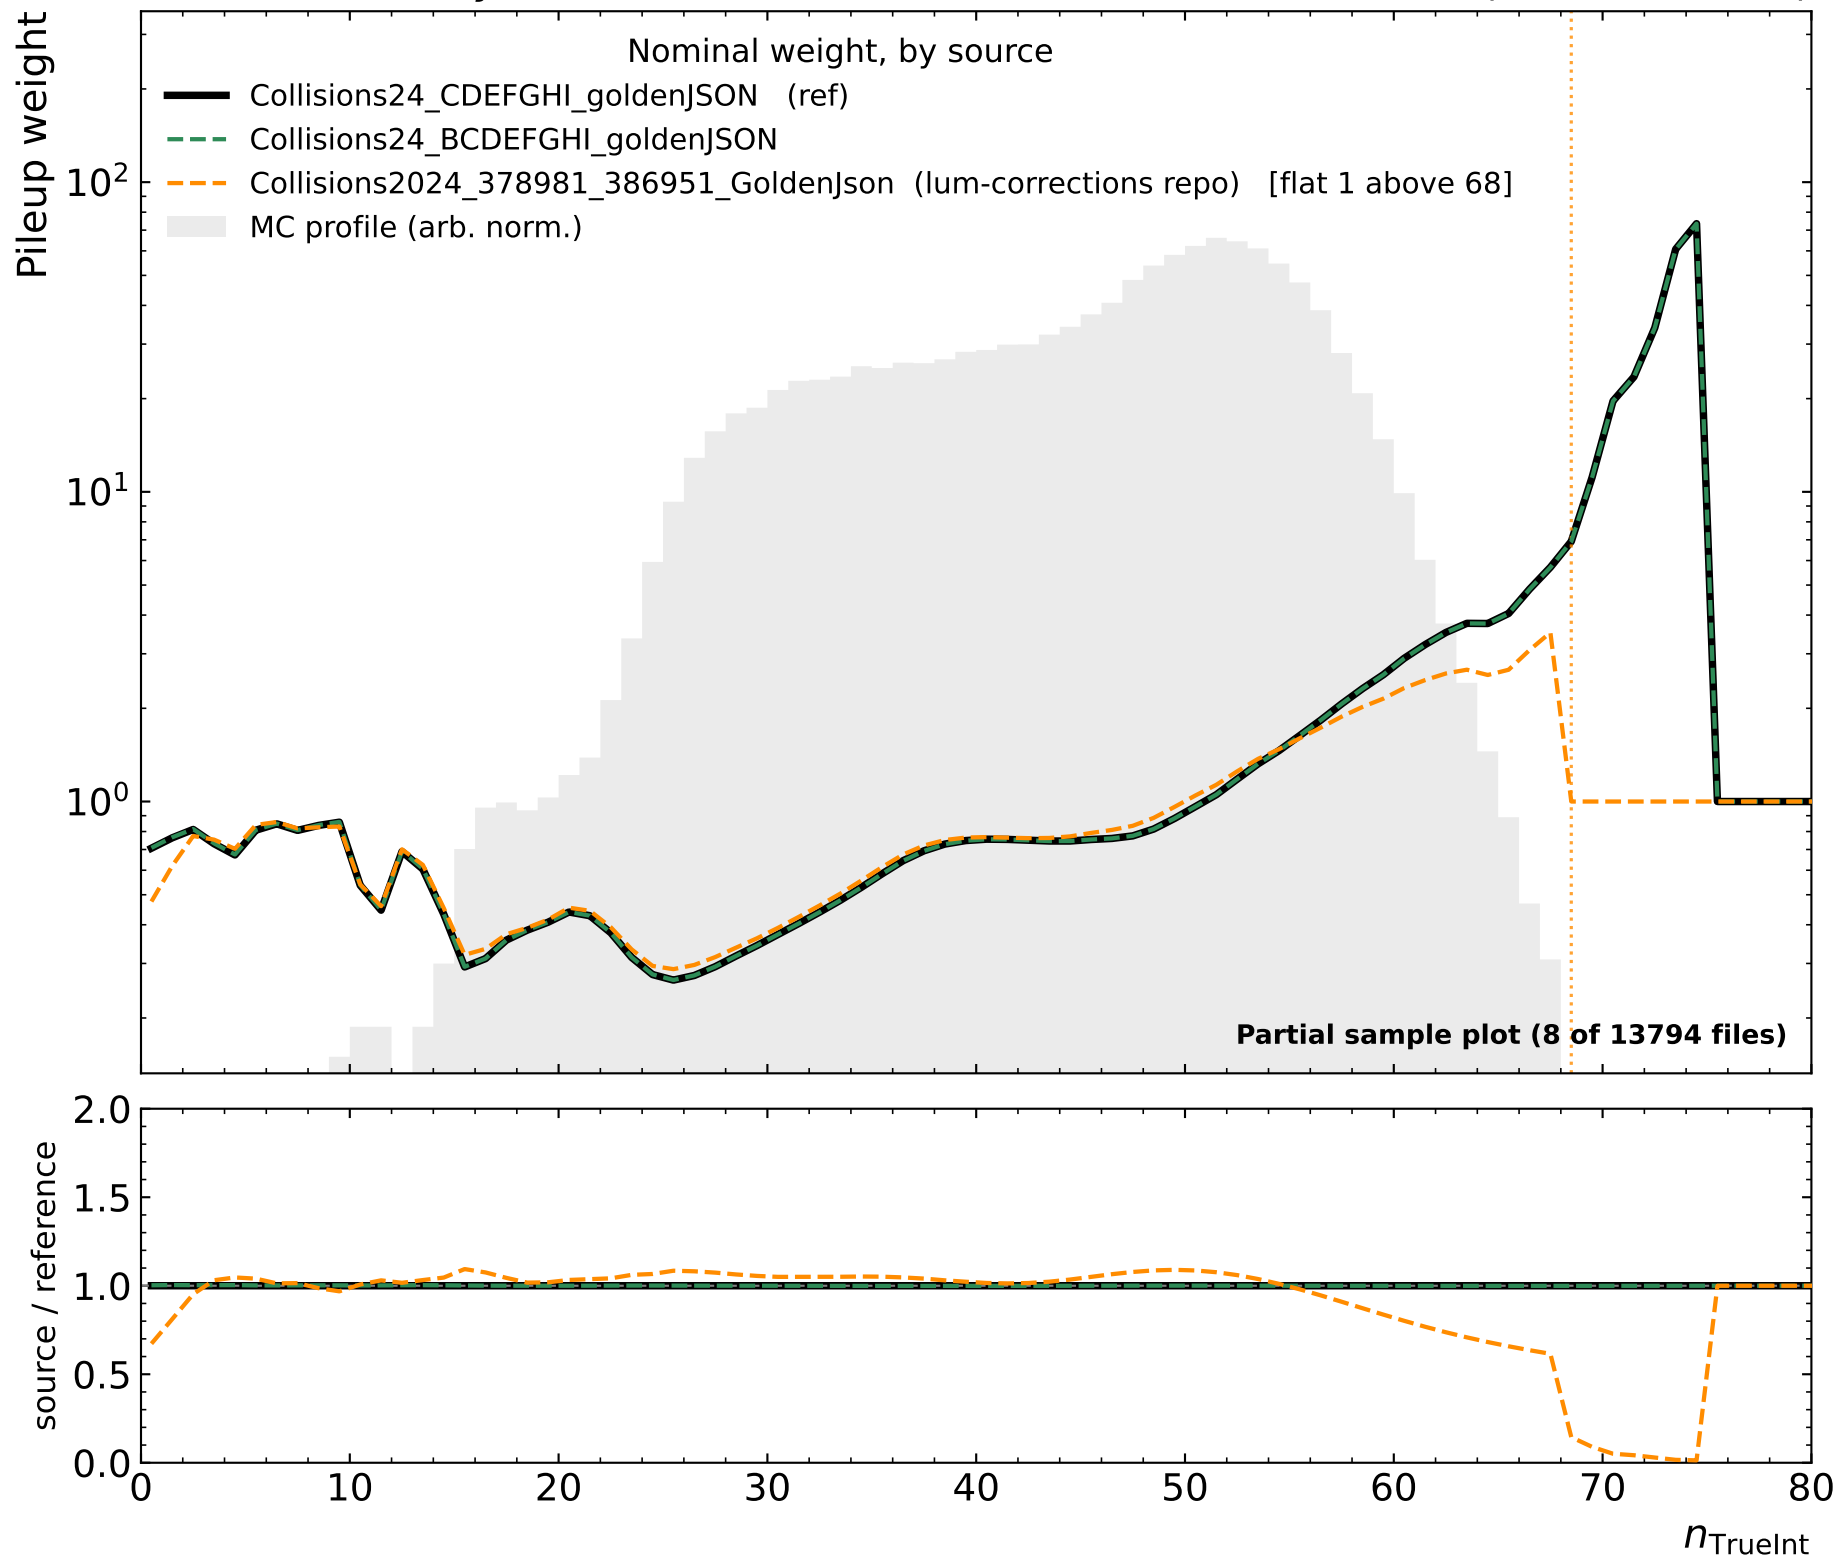

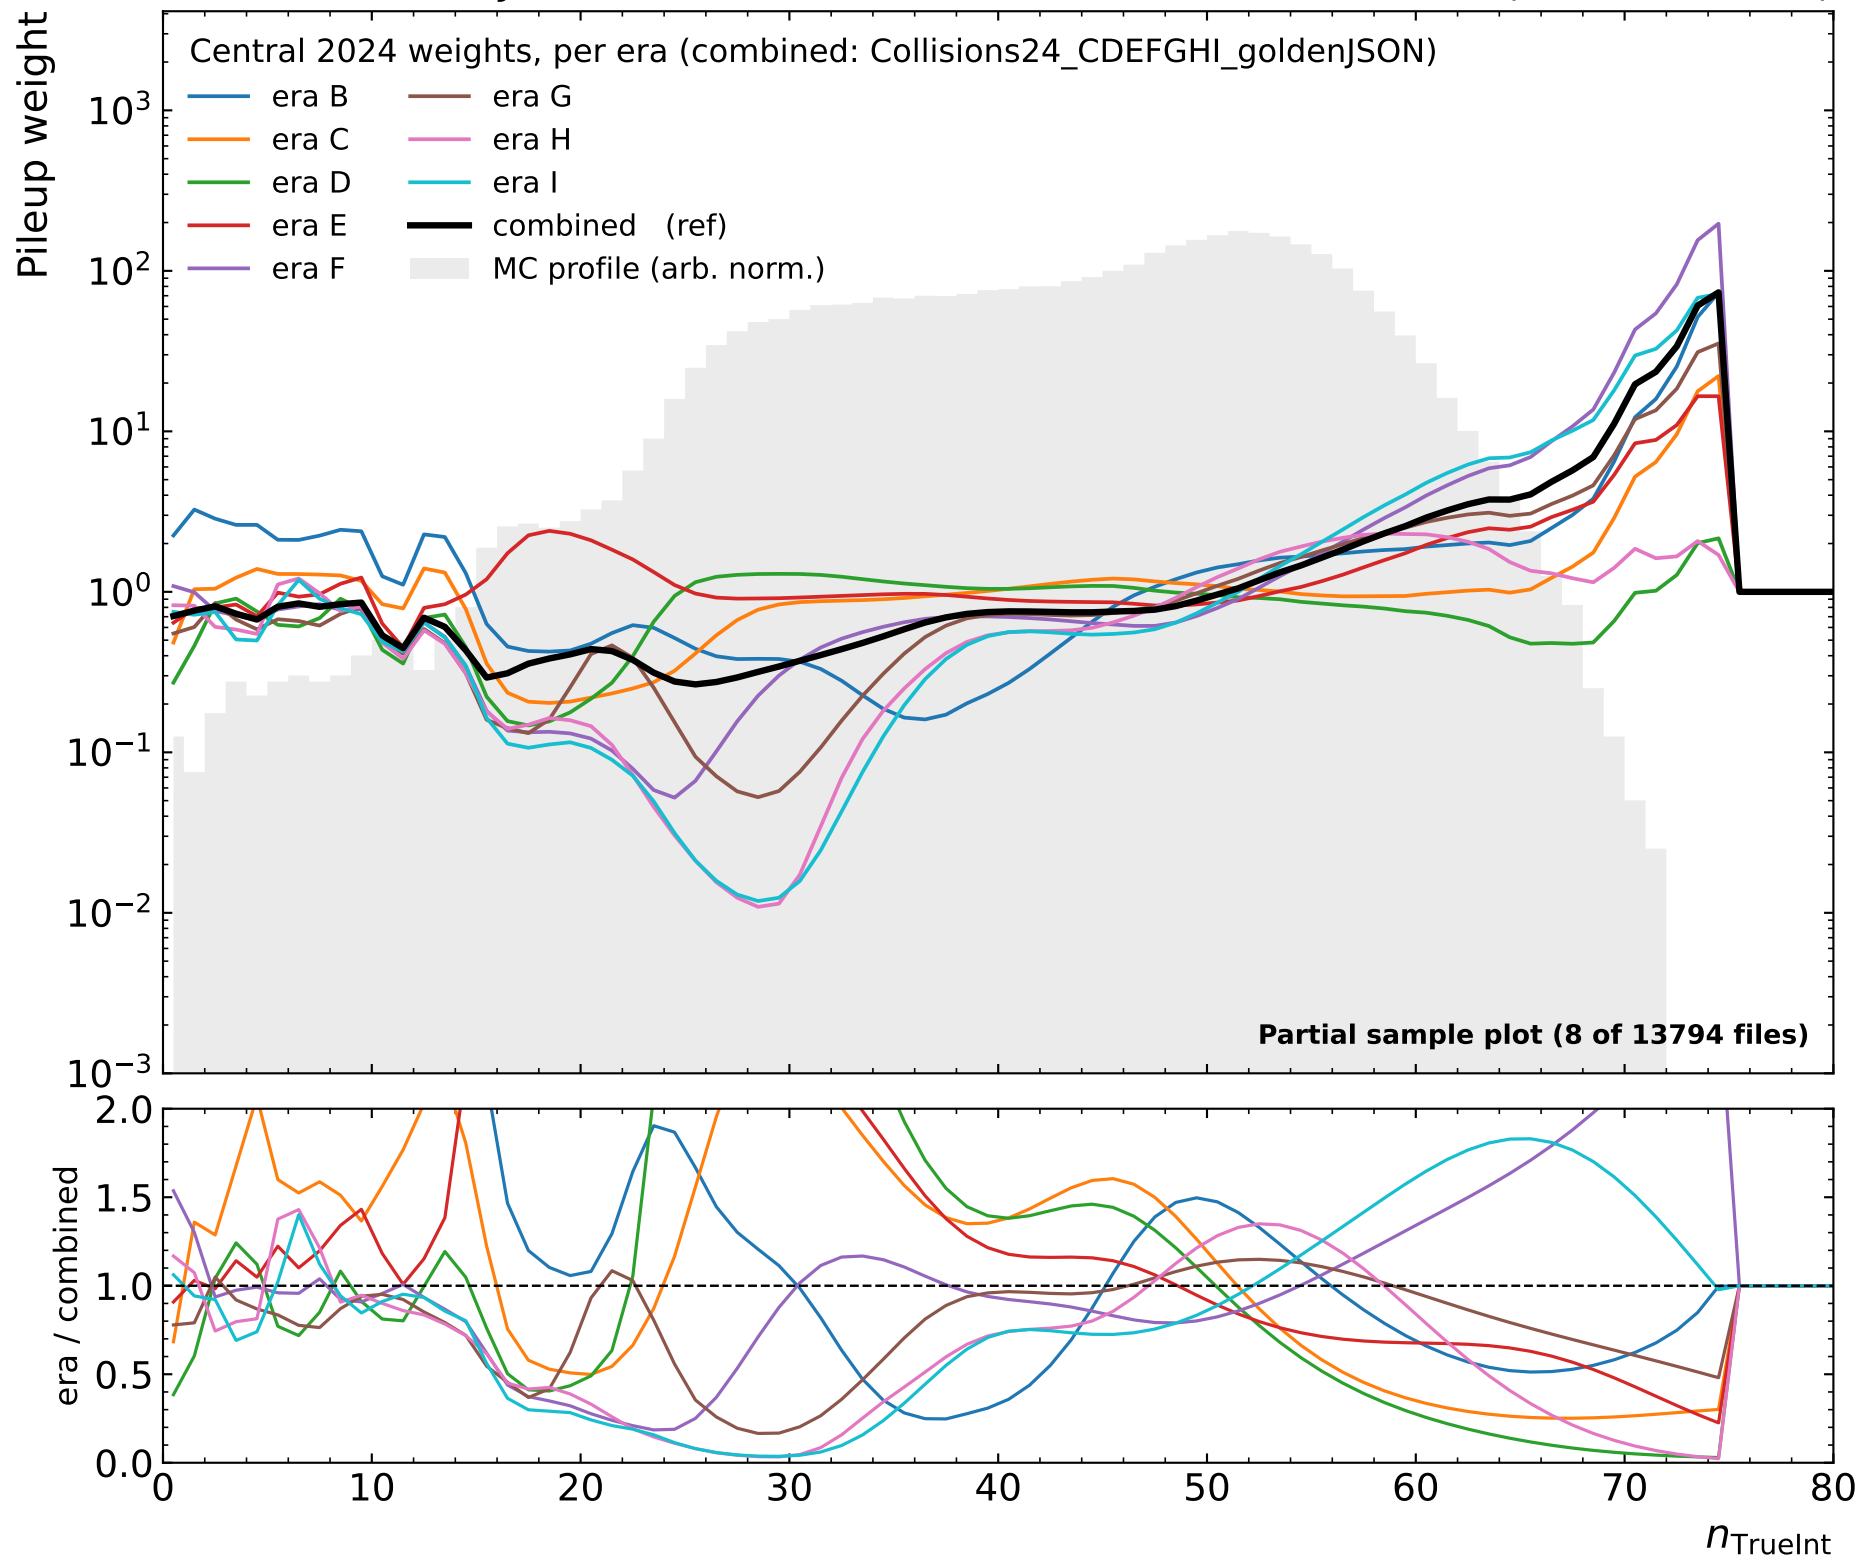

Weight sources compared -- central vs the lum-corrections stopgap

CMS Preliminary

(13.6 TeV, 2024)

Per-era pileup weights -- the handle a single merged histogram cannot give
CMS Preliminary (13.6 TeV, 2024)

Closure -- the reweighted MC is the pileup spectrum of the data

CMS Preliminary

(13.6 TeV, 2024)
